Building For the Future

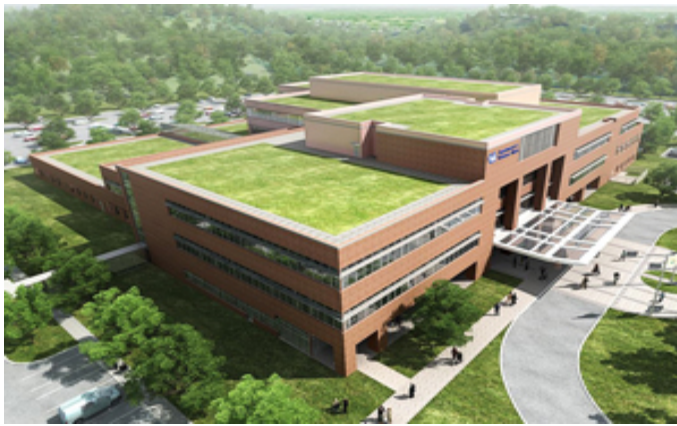

VA Butler Healthcare is continually improving existing structures, facilities, and technologies for our Veterans. Read about our construction initiatives below - and check out our completed construction projects, the new Community Living Center (CLC) and new Domiciliary.

Health Care Center

On December 31, 2014, the U.S. Department of Veterans Affairs (VA) awarded a lease contract for a 168,000 net usable square foot Health Care Center (HCC) in Butler, Pennsylvania, to Cambridge Healthcare Solutions PA, LP (Cambridge), of Vienna, Virginia. The HCC will expand VA Butler Healthcare's outpatient services to meet increasing Veteran demand and will include Primary Care, Specialty Care, Dental, Lab, Pathology, Radiology, Mental Health, and Ancillary and Diagnostic services.

The HCC will be a two-story (168,000 net usable square foot) building located on North Duffy Road, approximately 1.4 miles away from the Butler campus. Construction completion is anticipated to be 31 months from the award of the contract. During the design and construction of the new HCC, Veterans will continue to receive services without interruption either at the current main facility or one of our five Community Based Outpatient Clinics.

Check back on this page for updates as we work to *Make Lives Better* for our Veterans and their families with this new facility.

Completed Construction Projects

Community Living Center

The mission of VA Community Living Centers is to restore the Veteran to maximum function and independence, prevent declines in health, and provide comfort at the end of life. Now complete, VA Butler Healthcare's new CLC houses 60 Veterans and encompasses 54,000 square feet. It is designed to make Veterans feel more at home by providing them with a community setting, as well as private rooms and baths. Domiciliary

VA Domiciliaries have evolved from a "Soldiers' Home" to become an active clinical rehabilitation and treatment program for male and female Veterans and domiciliary programs are now integrated with the Mental Health Residential Rehabilitation and Treatment Programs (MH RRTPs). VA Butler's new 56-bed Domiciliary provides residential rehabilitation for Veterans suffering from substance abuse, homelessness and behavioral health issues.
