

We are very excited to nearly have our project completed at 7500 Greenway Drive in Greenbelt. As you know, we started the project in the late summer of 2018 with the expectation of creating a fresh, modern workplace for our team and our customers. While there have been a variety of project delays, there has been one individual on your team that has worked diligently to ensure project schedules were met and our team feels he deserves recognition. I am referring to the Cambridge project foreman, Al Weaver, who is outstanding at what he does. He displays an unwavering commitment to what he does and will always do "whatever it takes" to ensure customer satisfaction. There have been many times where he has gone that extra mile for us and it is really appreciated. Furthermore, he has a great working relationship with our team and everyone enjoys working with him.

Respectfully,

Ajay Handa | CEO
